1. DAP building and construction related projects should meet or exceed Australian standards wherever reasonably practicable to do so. Departure from Australian WHS standards on the basis that meeting such standards is not “reasonably practicable” should only be accepted where it is defensible to do so, supported by a clear, persuasive and documented explanation. In such cases, the project should meet the highest standard that is reasonably practicable, with hazard mitigation measures supported by a hazard identification and risk assessment report identifying the residual risks of injury and illness to any workers or third parties, and proposed mitigation strategy.
